

Post-Webinar Test Questions:
Hemali Patel, RDH, BS, MS & Kelsey Swiggett –
Beyond Bacteria: The Next Frontier in Salivary Testing

1. Salivary testing involves analyzing saliva to detect:
 - a. Bacteria
 - b. Enzymes
 - c. Hormones
 - d. All of the above

2. Which testing process allows for same day results in about 5 minutes with an assessment of your microbiome, salivary biomarkers, and contents?
 - a. Lab-based testing
 - b. Point-of-care testing
 - c. Not yet developed

3. Salivary testing can help clinicians build trust with their patients due to:
 - a. Personalized care
 - b. Transparency and communication
 - c. Consistency in care
 - d. All of the above

4. Which biomarker is associated with tissue breakdown due to its role in degrading collagen and is an important biomarker for Periodontal screening?
 - a. Porphyromonas Gingivalis (Pg)
 - b. Matrix Metalloproteinase (MMP-8)
 - c. Nitric Oxide
 - d. Glucose

5. Nitric Oxide's role in the body is:
 - a. Vasodilation and cardiovascular health
 - b. Immune response and inflammation
 - c. Cellular communication
 - d. Neurotransmission
 - e. All of the above
